

What Would You See if You Were a Kite?

Where would you go? Would you fly over the school? Over the zoo? Over the mountains? During this discussion, students' imaginations will soar to new heights! In advance, cut a supply of kite shapes from 12" x 18" construction paper. Sing the song below and then invite children to discuss the places they'd like to fly and the things they would see if they were kites. Follow the discussion by inviting children to illustrate on their kites what they would see. Write each student's dictation below her picture. When the illustrations are complete, have each child glue a crepe paper tail to her kite. Mount the completed projects on a bulletin board titled "Kites in Flight." 📖

(sung to the tune of "Man on the Flying Trapeze")

If you were a kite, tell me, where would you go?
Would you fly way up high and then dip down so low?
Would you float in the clouds and then soar through the sky?
Oh please, tell me, where would you fly?

If you were a kite, tell me, what would you see?
When you fly in the air over houses and trees?
Would you wave to your friends, your mother, and me?
Oh please, tell me, what would you see?

After all this kite hungry for a snack In advance, cut a into kite shapes us children to help m softened cream cl one tablespoon of yummy snack, en cream cheese mi zel sticks as show delicious kites str
